TerryWhite Chemmart Coffs Harbour named NSW Pharmacy of the Year

TerryWhite Chemmart Coffs Harbour has been awarded the prestigious state 2018 TerryWhite Chemmart Pharmacy of the Year for New South Wales.

Announcing the pharmacy's win at the group's national conference in Sydney last week, TerryWhite Chemmart CEO Anthony White said the Coffs Harbour team's ability to engage the community through creative initiatives stood them apart as worthy recipients of the state award.

"With so many wonderful pharmacies in our network doing such innovative things, it's never easy to single out just one winner from each state," Mr White said.

"Tanya and her team at Coffs Harbour just stood out to us as having had an excellent year with some brilliant health programs and we couldn't go past them as the state winner for New South Wales."

Tanya Maloney, Managing Partner at TerryWhite Chemmart Coffs Harbour, said that winning was a credit to the entire pharmacy's team and reflected the trust the local community had in them as a health destination.

"Our team is the A team! They are all passionate about what they do and they spread this energy and enthusiasm into the local community," Ms Maloney said.

"We empower our community to make good healthcare decisions by having our seven pharmacists available to engage with our customers and give back to our community through donations and sponsorships to local sporting clubs and charities, she said.

"We like to be really visible and accessible in our community and let them know what we can offer them to support their health and wellbeing."

The team was also recognised in the local community by being honoured with the Retail Award for Coffs Harbour Sunny's Business Awards.

Ms Maloney said celebrations would continue into November when the pharmacy will commemorate their 25th birthday.

“We look forward to celebrating with the Coffs Harbour community who have supported us over this time, ensuring we have been able to remain a successful, locally-owned business and provide job security for many local families,” she said.
